

HIGH TEMP STANDARD CONNECTOR

with thermocouple material contacts; 350 °C

Features:

- Heavy duty solid pins
- Body brown, calibration indication printed.

Specifications:

Body material	:	fibre glass reinforced thermosetting plastic with a good dielectric strength
Contacts	:	made of thermocouple material, plug with standard size solid pins, jacks spring loaded, contacts polarized
Max. temperature rating	:	350°C
Max. conductor diameter	:	1,6 mm
Max. cable diameter	:	6,4 mm
Identification	:	brown bodies, calibration indication printed on cover
Accessories	:	see reverse side
